

Azure Latency Test

Test network latency from your IP location to Azure datacenters worldwide. Choose the datacenter closest to you. To compare with AWS regions, visit [AWS Latency Test](#).

TESTING STEPS

- 1 Select your Azure regions.
- 2 Let the latency check run.
- 3 Review the recommended regions.

0 / 47 regions selected **Select at least one region to start your test.**

Recommended Azure Regions

No recommendations yet

Pick at least one region above.

We surface the top matches once the first latency samples arrive.

Your connection [Hide details](#)

Your network Gestión de direccionamiento UniNet (AS8151)

Your IP address 189.142.8.254

Azure Latency Test Results

No latency results yet

Choose one or more regions above.

We start the test automatically and stream results here once data is collected.

Important Note: This site enables easy Azure network connectivity testing in your browser. It compares latency across regions but does not measure the absolute lowest latency. Results are indicative. For more accurate measurements, visit [PsPing Network Latency Test](#)
