

LEGO Catalog Database Downloads

LEGO Catalog Database Download

The LEGO Parts/Sets/Colors and Inventories of every official LEGO set in the Rebrickable database is available for download as csv files here. These files are automatically updated daily. If you need more details, you can use the [API](#) which provides real-time data, but has rate limits that prevent bulk downloading of data.

You can use these files for any purpose. If you publish any articles please [let us know](#) and maybe we can help promote it.

- This database stores only official LEGO items - Sets, Parts and Minifigs (no B-Models, Sub-Sets, MOCs)
- Sets and Minifigs contain one or more Inventories (inventories.csv)
- Inventories can contain Sets (inventory_sets.csv) and/or Parts (inventory_parts.csv) and/or Minifigs (inventory_minifigs.csv)
- Part Relationship rel_types are: (P)rint, Pai(R), Su(B)-Part, (M)old, Pa(T)tern, (A)lternate
